

ANNUAL SUMMIT 2019: *ACCELERATING SUCCESS*

Thursday 14th March 2019, BMA House, London

#SummitPanc19

Supported by:

PROGRAMME

ACCELERATING SUCCESS FOR PANCREATIC CANCER

09.30	Chair's welcome	Lynne Walker , Chair of the Board of Trustees, Pancreatic Cancer UK
09.35	Working together to accelerate success	Diana Jupp , Chief Exec, Pancreatic Cancer UK
09.55	Insights and reflections	Patient representatives to be confirmed
10.15	Accelerating early diagnosis research	Professor Steve Pereira , Professor of Hepatology & Gastroenterology, University College London
10.40	Networking and refreshments	

ACCELERATING ACCESS TO TRIALS AND TREATMENT

11.00	Trials by collaboration	Dr Hanneke Wilmink , Medical Oncologist, Cancer Centre Amsterdam, Amsterdam UMC
11.20	Personalising treatment with PRECISION-Panc	Professor Andrew Biankin , Professor of Surgery, University of Glasgow and Director, Wolfson Wohl Cancer Research Centre Janice Tannock , PRECISION-Panc Patient Advisory Group
11.40	Questions and discussion	
11.50	Bringing breakthroughs of the future to fruition	A Future Leader (poster competition winner)
12.00	Precision radiotherapy	Dr Ganesh Radhakrishna , Consultant Clinical Oncologist, The Christie Foundation NHS Trust
12.10	Diagnostic PET-CT scanning	Professor Paula Ghaneh , Professor of Surgery, Department of Clinical and Molecular Medicine, University of Liverpool
12.20	Questions and discussion	

12.30 Lunch and the Pancreatic Cancer UK Star Awards

We're so proud to have such dedicated supporters, some of whom have been affected by pancreatic cancer themselves, and to know health professionals who have gone beyond the call of duty to help those affected by the disease. Please join us for a short ceremony where we will show our appreciation by presenting them with a **Star Award**.

BREAKOUT SESSIONS

- 13.30 **Meeting the needs of pancreatic cancer patients**
Clinical trials: developments, expectations, access
Optimising the treatment pathway

Please see back page for information about the breakout sessions

ACCELERATING ACTION FOR PATIENTS

- 14.30 Networking and refreshments

- 15.00 **The NHS Long Term Plan for Cancer: making it work for pancreatic cancer**

Chaired by **Nicholas Owen**,
Broadcaster and journalist

Panellists:

David Fitzgerald, Programme Director for the NHS Cancer Programme, NHS England

Nik Dakin MP, Chair of the All-Party Parliamentary Group on Cancer

Dr Andrew Millar, Consultant Gastroenterologist and Hepatologist, North Middlesex University Hospital NHS Trust

Professor Sean Duffy, Clinical Lead, West Yorkshire and Harrogate Cancer Alliance

Clinical Nurse Specialist to be confirmed

Patient Representative to be confirmed

Diana Jupp, Chief Exec, Pancreatic Cancer UK

- 16.00– 17.00 Drinks reception, we hope you will join us.

#SummitPanc19

Meeting the needs of pancreatic cancer patients

Pancreatic Cancer UK's recent patient survey, the first of its kind, highlighted the need for the provision of greater psychological support, improved communication at diagnosis and a holistic needs assessment to better meet the needs of patients. Our specialist panel will lead a discussion on how we can best address those needs to have a positive impact on patient experience and really make a difference.

Chaired by **Anna Jewell**, Director of Operations, Pancreatic Cancer UK

Professor Eila Watson, Professor of Supportive Cancer Care, Oxford Brookes University
Further speakers to be confirmed

Clinical trials: developments, expectations and access

Whether designing them, delivering them or participating in them, clinical studies and the new treatments they deliver, benefit us all. But they are not without their challenges; this is especially the case in the context of pancreatic cancer. Join our panel of experts who will discuss current and forthcoming studies and contribute to a discussion on how the pancreatic cancer community can help ensure that clinical trials are more accessible and successful in years ahead.

Chaired by **Chris Macdonald**, Head of Research, Pancreatic Cancer UK

Professor Brian Davidson, Professor of Surgery, UCL; **Dr Bristi Basu**, Academic Consultant in Experimental Cancer Therapeutics, **Dr David Chang**, Clinical Senior Lecturer in Surgery, Wolfson Wohl Cancer Research Centre PRECISION-Panc; **Patient representative to be confirmed**

Optimising the treatment pathway

Using examples of current best practice, and learning from the redesign and implementation of optimal treatment pathways for other cancers, this session will look at the benefits of a holistic and integrated approach to ensure that patients eligible for surgery are fit and well to be treated, and have the best chance to live longer.

Chaired by **Mr Keith Roberts**, HPB Consultant Hepatobiliary and Pancreas Surgeon, University Hospitals Birmingham NHS Foundation Trust

Mr Giuseppe Kito Fusai, Consultant Surgeon, Royal Free London NHS Foundation Trust; **Neil Bibby**, Macmillan Senior Specialist HPB Dietitian, Manchester Royal Infirmary; **Mr Declan Dunne**, Consultant Surgeon, Royal Liverpool and Broadgreen University Hospitals NHS Trust; **Hilary Brown**, Senior Fellow, Health Services Management Centre, University of Birmingham; **Professor David Baldwin**, Chair of the Clinical Expert Group for Lung Cancer, Nottingham University Hospitals NHS Trust
