Welcome and introduction

Professor Paula Ghaneh, Professor of Surgery and Honorary
Consultant Surgeon at the University of Liverpool

**Pancreatic
Cancer
UK**

Overview of the day

The statistics facing people with pancreatic cancer

7 in 10 people with pancreatic cancer never receive treatment - not even chemotherapy

More than half of people die within three months of diagnosis

The objectives of the Optimal Care Pathway initiative are to:

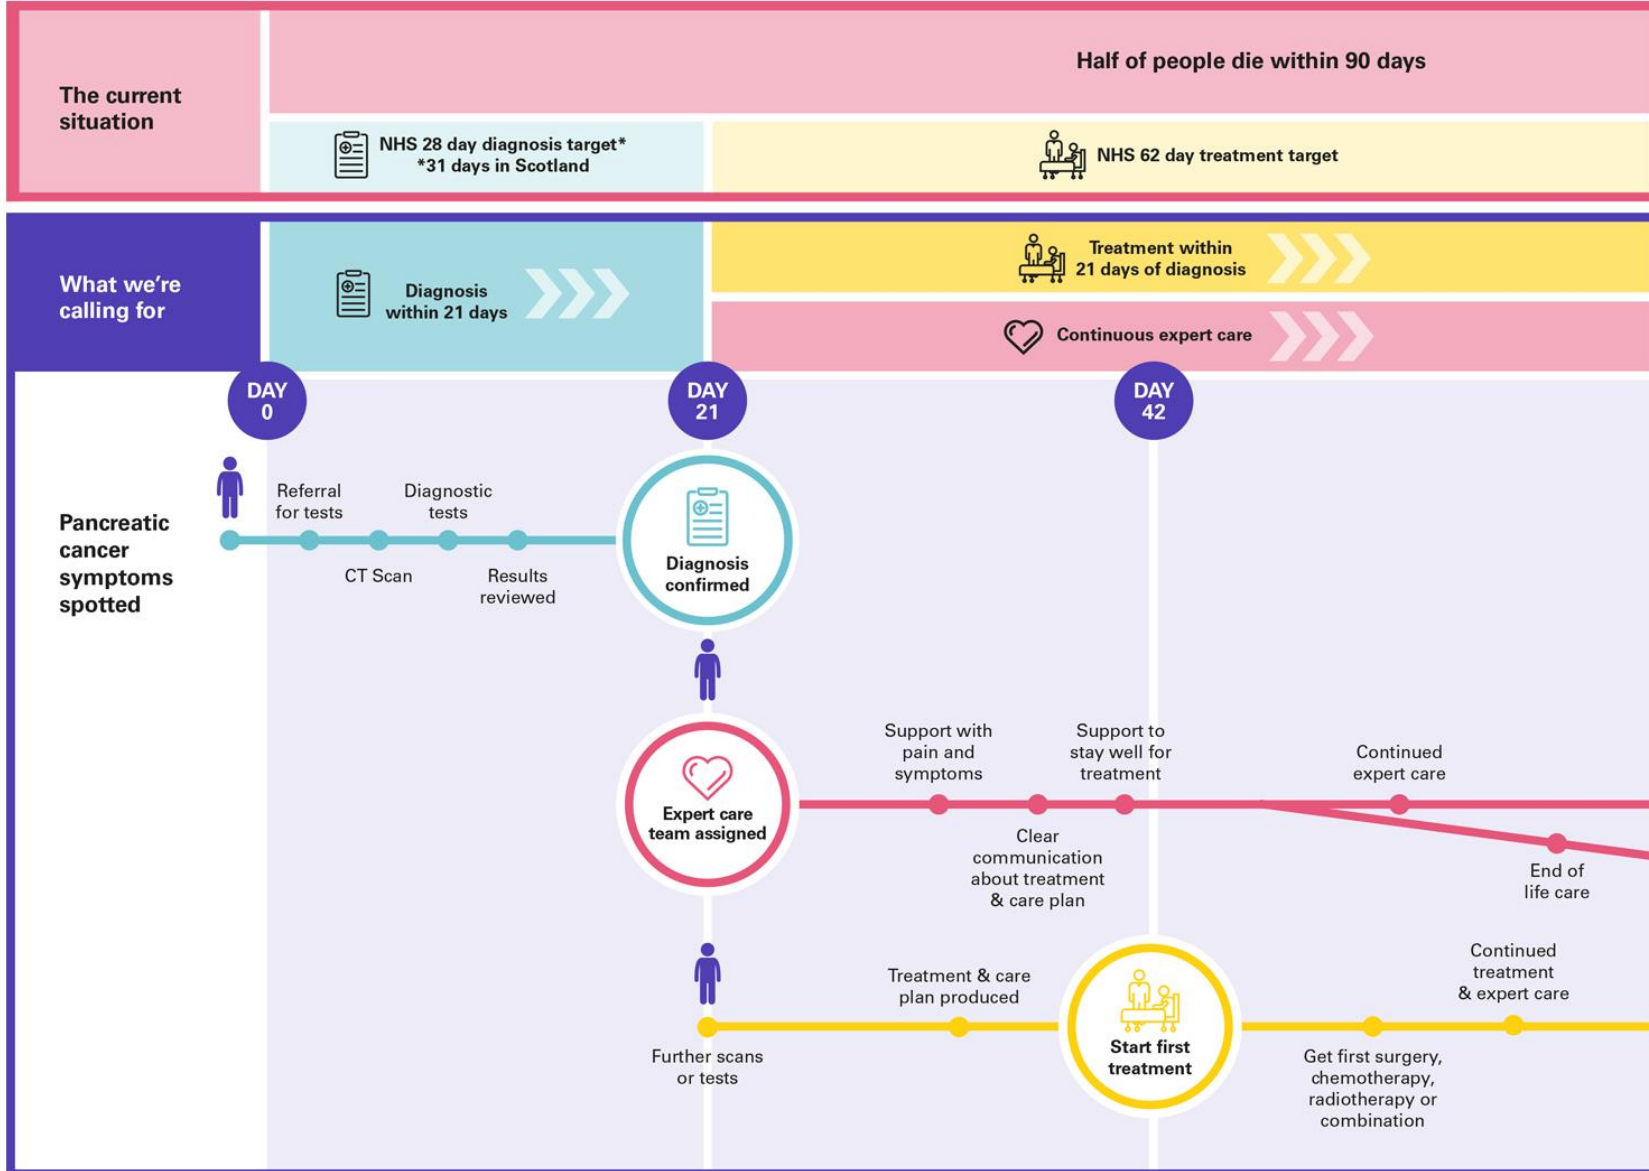

1. Standardise and drive improvements in diagnosis, treatment and care for people with pancreatic cancer,
2. Ultimately, ensuring that everyone with pancreatic cancer can live well and for as long as possible.

To achieve our objectives, the Optimal Care Pathway initiative set out to:

- Understand the issues facing people with pancreatic cancer,
- Understanding the issues facing local health systems and health professionals,
- And to develop solutions to overcome these challenges.
