

# How can your donation help?

**Pancreatic  
Cancer  
UK**

Scan to donate

**£50**

Could provide six patients and their families with Newly Diagnosed Packs; providing vital information and support on coping with diagnosis and managing treatment.

---

**£100**

Could provide four hours of nursing support for patients and families on our Support Line; providing a lifeline in their hour of need.

---

**£200**

Could buy equipment to help our researchers grow cells in their laboratory. This is important for pancreatic cancer research, as new treatments have to be tested in cells before they can be used on humans.

---

**£500**

Could fund one of our PhD scientists in the lab for a week, as they explore how to make immunotherapy a potential treatment option for pancreatic cancer.

---

**£1,000**

Could fund quality checks for researchers to ensure potential new tests for pancreatic cancer are reliable.

---

**£5,000**

Could help our researchers use a cutting-edge laboratory technique to study what causes the growth and spread of pancreatic cancer.

---

**£10,000**

Could give our researchers access to specialist equipment that will help them identify the most accurate biomarkers of pancreatic cancer- the biological alert signals found in the body. Understanding this is critical to making early diagnosis a reality.
