

Getting translated information for your patients

from pancreaticcancer.org.uk

What does Recite Me do?

Recite Me is a built-in accessibility tool addressing many different user needs.

It can:

- Read all the content aloud
- Generate a downloadable audio file
- Change the colours and contrast
- Change the font style
- Resize the text
- Add a magnifier
- Superimpose a ruler or a 'focus area' so people can focus on 1-2 lines at a time
- Change the look of the page to 'text only'
- But our focus today... **translation!**

How to use it

on pancreaticcancer.org.uk

What does it not do?

- It isn't a specialist medical translation tool. Try to make patients aware of that if you can.
- It does not translate videos, physical booklets, images, or PDFs.
- It does not translate the search bar.

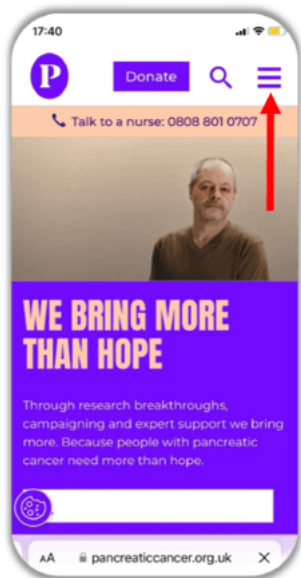

But with +100 languages and a 'read aloud' function, it can help so many people access information!

Other resources for accessibility

- **Videos** on our accredited YouTube channel and via pancreaticcancer.org.uk/videos
- Key information in **Easy Read** format from our shop (free)
- **Braille, large print and audio** CDs on request (free) at pancreaticcancer.org.uk/accessible-information
